

Product Discontinuance Notification

Dear Valued Customer

This letter serves as formal notification to discontinue the supply of LL400xG in MELF package product series due to our subcontractor will no longer be able to support the demand as their wafer supplier will close due to financial instability.

To minimize the impact of this product discontinuation, we will be offering S1x series in DO-214AC (SMA) package from our internal manufacturing as a replacement. The electrical performance is comparable but in a different form factor.

We regret any inconvenience this announcement may cause, and we continually ensure to supply your future product requirements with our world-class product lines.

TSC values our business relationship and looks forward to your continued interest in our products.

To best serve you, all inquiries and requests should be directed through your local Taiwan Semiconductor Field Quality Service or Customer Quality Engineer.

Signed:

Chris Lin
Product Marketing

Effectivity: May 2022

Affected Part Number List

Discontinued		Replacement	
Part Number	Package	Part Number	Package
LL4001G LOG	MELF	S1D	DO-214AC (SMA)
LL4002G LOG	MELF	S1D	DO-214AC (SMA)
