

**Issue Date:** May 29<sup>th</sup>, 2019

Dear Valued Customer,

This notice is to inform you of a product change affecting selected items that you have purchased from Littelfuse.

**Description of the Change:**

- We are changing some of our component supply chain on our Type 1 Box Style Circuit Breakers (Figure 1, below).
- Both studs on the 30062-xx PVC-Coated Box Style Circuit Breakers will be elongated to match studs on all other members of our Box Style Circuit Breakers.
- Copper studs on the 30063-xx PVC-Coated Box Style Circuit Breakers will be transitioned to Copper-Plated Steel studs.
- Fit\*, form, and function will remain the same for all part numbers listed.

*Figure 1: Type 1 Box Style Circuit Breaker*

**Reason for The Change:**

- Our legacy supply chains have led to duplicated vendor associations and suppliers.
- Examples of such inefficiencies are in the 3006x families, above. We are aligning these families with components common to all other Box Style Type 1 Circuit Breakers.
- As part of our continuous efforts to optimize our supply base, this will be the first of such PCNs on our Circuit Breaker products.

**Effective Date of the Change:**

August 2019

\*The only changes to any parts' physical characteristics will be with regards to our two 3006x families, as noted above

**What You Need to Do:**

- As we are coordinating this as a running change beginning in August 2019, your supply will not be disrupted.

If you have any questions, please feel free to contact your Littelfuse Customer Service Representative or your Inside Sales Representative. We appreciate your business and our continued partnership.

Sincerely,

Zachary Naughton  
Global Product Manager  
Littelfuse Commercial Vehicle Products
