## TE Connectivity

Product Change Notification: E-19-007122

PCN Date: 31-MAY-19

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

**General Product Description:**  
HOUSING, 10 POSN., J.P.TIMER TAB.

**Description of Changes**  
The Automotive Division of TE is expanding use of TE's existing resin supply base to meet our raw material supply demands to raise our customer service and improve delivery of quality product to the customer-requested dates. These facilities are TS16949 and ISO 9000/1 certified. The change of raw material will not affect electrical, mechanical and environmental performance. This activity will be completed once all due diligence is performed (ex. PSW, Prints, etc)

**Reason for Changes:**  
Product Improvement. These efforts will position us to serve your future needs. Material substitution will ensure uninterrupted material supply while minimizing the impact of raw material cost escalations. A generic dimensional report will be issued to save time by reducing repetitive measurements for multiple connector and terminal family configurations. Please contact your TE Connectivity Sales Engineering representative with any questions regarding this correspondence.
