PRODUCT BULLETIN

Bulletin No: PB376

Issue Date: 4-19-2016

Effective: 5-31-2016

Product Description:

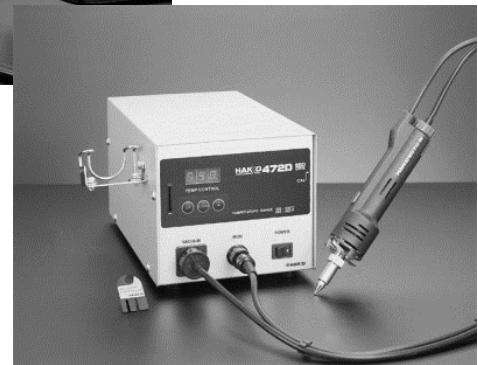

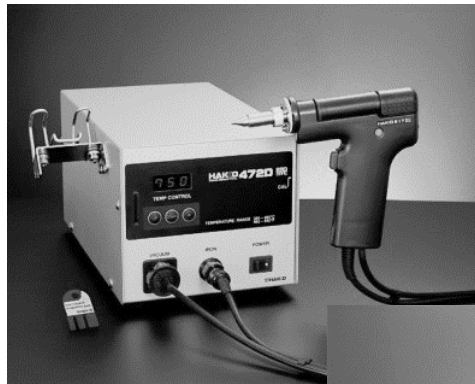

HAKKO 472D Desoldering Station

Part No:

472D-01, 472D-02, 472D-0001

Specification:

DISCONTINUED

Comments:

The HAKKO 472D Desoldering Station will be discontinued on May 31, 2016 or once the remaining supply has been exhausted. The HAKKO FR-410 Desoldering Station will be available starting May 2, 2016 as a direct and improved replacement. **Note: The FR-410 uses the new N61 series nozzles and is not backwards compatible with the 472D nozzles.**

As all good things must come to an end, the HAKKO 472D was known for its reliability and its powerful, self-contained suction for over 10 years. The station was also popular for having both pencil and gun styles and the HAKKO FR-410 will offer the same along with other customer suggested improvements.

The HAKKO FR-410 features increased power and an anti-clogging feature which helps ensure instantaneous application of peak vacuum pressure to the solder joint using a delay timer to prevent the premature release of vacuum pressure. This station also has a large, easy to read display that includes a vacuum level indicator to indicate clogging, 3 user programmable presets, and process control password lockout to prevent any unauthorized changes to the systems operation or setup.

HAKKO guarantees a replacement part supply for a period of three (3) years, and a consumable parts supply for a period of five (5) years after the date of discontinuation of a product. After applicable guarantee periods, replacement and consumable parts may only be available while supplies last. No orders will be accepted for the part numbers listed herein once out of stock.
