Product Change Notice	Date: November 27, 2018
Product	TransPort Cellular Routers – Change to Firmware Default
Notice Number	181127

Reason for Notification: The setting that enables communication to Digi Remote Manager (DRM) through a Digi TransPort's WAN connection is now enabled by default. This setting change now provides customers the ability to simplify device deployment through remote configuration management.

Audience	All Cellular distributors

Product Notice	The setting that enables communication to Digi Remote Manager (DRM) through the devices WAN connection is now enabled by default. Once a device is registered into a customer account, custom configurations can now be automatically downloaded using the profile management feature. For customers that do not use DRM, or have network restrictions that prevent WAN connection to DRM, Digi recommends disabling this setting. Registering a device into a DRM account now requires the user to provide the MAC Address or Device ID as well as an install code or default password. The methods for registering devices include: • From the device's web interface using the install wizard • From Digi Remote Manager • Using the new Digi Remote Manager Mobile App (see details below) Bulk registering devices is still fully supported by importing a file (CSV format) of Device IDs and install codes which are provided in the QR code on the device label. For customers needing assistance in bulk registering devices into their DRM account and/or obtaining install codes, please contact Digi Technical Support.

Affected Products	· Digi TransPort WR11XT	· Digi TransPort WR44RR
	· Digi TransPort WR21	· Digi TransPort LR54
	· Digi TransPort WR31	· Digi TransPort WR64
	· Digi TransPort WR44R	

Timing	This change will be enabled on all products listed above that ship from Digi after December 17th, 2018.

| **Action Required**	This notice is for informational purposes only.

Additional Details:

Digi Remote Manager Mobile is now available in Apple and Android versions.

This application provides the ability to easily register devices into your DRM account by scanning the QR code on the device or carton label. The application also provides a health dashboard, device status as well as simple device management capabilities.
