## Product Change Notification

### Dear valued customers

This is to inform you formally that a product change will be made to the following products.

#### 1. Products affected

Product Name : Liquid leak sensors

Series Name : WL10 series

#### 2. Description of change

The Red LED that is used to show leak-detection will change (component change).

	Before the change	After the change
Manufacturer	Kingbright Electronics Co. Ltd.	
Part number	<i>KPT1608LSRW-PRV</i>	<i>KPT1608LR01C-KL</i>

#### 3. Reason for change

The current supplier of the Red LED, *Kingbright Electronics Co. Ltd.*, is discontinuing the production of the “KPT1608LSRW-PRV”. The replacement LED is offered by exactly the same supplier.

#### 4. Evaluation

They are generally equivalent to each other in basic characteristics, apart from the level of luminous intensity. By changing the level of current on the circuit, the luminous intensity of the replacement will be the same as that of the current LED. There are no specifications changes to these liquid leak sensors.

#### 5. Implementation date

The estimated implementation date is from June 2023 onward on a production basis, however it may change, depending on how quickly the current stock will be gone.

Current LED

Replacing LED

The level of luminous intensity of the replacement is equivalent to that of the current LED.
