

OneSimCard Data Plans

OneSimCard M2M♦IoT offers data services in 160+ countries. We offer both Pooled Data Plans and Pay-As-You-Go (PAYGO) Plans. All plans are available on our “no steering” SIM cards. No steering means we allow your device to determine with which available network to connect. All SIMs utilize a single APN and single SIM Management portal anywhere in the world your device(s) operates.

Pooled Data Plans are highly customized for each client based on their individual requirements. The table below demonstrates potential costs associated with our pooled data plan. Each SIM contributes a set amount of data, “Package MB,” to the overall data pool. For example, a client with 1000 SIM cards and each SIM is on a 5MB Package, then the total amount of pooled data shared among all SIMs on the account would be 1000 X 5 = 5000MB. Pooled data plans have no minimum usage requirements. Every SIM on a particular account must be on the same sized Package.

These costs are for illustrative purposes only. We work with you to determine your particular needs and develop the exact plan with the countries where you need data connectivity.

PAYGO data plans are pre-paid and each SIM can have a separate plan depending on the particular requirements for the device in which the SIM is inserted. Unlike Pooled plans, PAYGO plans are pre-packaged and there is no flexibility in the sizes of the data plans offered. SIMs on PAYGO plans have a minimum monthly usage requirement of \$2.00 which may be satisfied by either choosing a plan of \$2.00 or higher, or using an amount of per MB data equal or greater than the monthly minimum usage requirement.

*PAYGO Per MB cost is country dependent

How to choose the plan that's right for you

Pooled Data Plan

- Data consumption is known/tested
- All SIMs have similar data consumption
- Required countries list is smaller

PAYGO Data Plan

- Data consumption is unknown/tested
- SIMs have varied data consumption
- Required countries list is larger/more diverse
