RE: Update for 3M™ Antistatic Tape Dispenser 620

Dear Valued Distributor:

3M Electrical Markets Division announces an update to 3M™ Antistatic Tape Dispenser 620.

3M EMD is making minor changes to the 3M Antistatic Tape Dispenser 620. The existing 3M Antistatic Tape Dispenser 620 is being phased out and replaced by the new version once current inventories are depleted. New orders will be automatically replaced with the updated version of the 3M Antistatic Tape Dispenser 620.

Status	Product description	SKU	UPC Number	Billing Unit	MOQ	Case Quantity	
Discontinued	620 Model Tape Dispenser	80-6109-1007-9	00051138480110	each	1	1	
Discontinued	620 Dispenser Replacement Blade	80-6109-1026-9	00051138480301	each	1	1	

Why the change?

We expect no change in performance of the new version of this dispenser, compared to the existing version. These changes are required to keep the Antistatic Tape Dispenser 620 current. The labels, packaging and manufacturing location will be updated so that the Antistatic Tape Dispenser 620 continues to be available.

See updated 3M Antistatic Tape Dispenser 620 product information.

Although 3M has maintained prices on this dispenser and replacement blades for several years, we regret that increases in raw materials costs have forced us to raise the prices.

Status	Product description	SKU	UPC Number	Billing Unit	MOQ	Case Quantity	
New	620 Model Tape Dispenser	80-6116-0861-5	00054007958987	each	1	1	
New	620 Dispenser Replacement Blade	80-6116-0862-3	00054007958994	case	1	5
