MODEL NUMBER: TLP1G

1-outlet surge protector safeguards a home/office electronic device against dangerous surges, spikes and line noise.

Features

1-Outlet Surge Protector Safeguards Your Sensitive Electronics Against Power Fluctuations Ideal for your home or office workstation, this Protect It!® single-outlet surge protector features a surge suppression rating of 250 joules and provides protection in line-to-neutral (L-N) mode to defend your sensitive electronic components against power surges and spikes.

Designed for Quick, Easy Connection in Tight Spaces Compatible with standard electrical equipment, this surge protector plugs directly into a Schuko wall outlet (no cord required), so you can install it behind furniture placed flush against the wall. It features one Schuko outlet and a durable white plastic housing. It is ideal for powering almost anything with a compatible plug, including computers and mobile devices to appliances and power tools.

Premium Protection from EMI/RFI Line Noise Helps Your Equipment Perform Better Various electromagnetic and radio sources found in virtually every home and business can cause disruptive interference on the AC line. Known as EMI (electromagnetic interference) and RFI (radio frequency interference), this line noise is a common cause of performance problems. This surge protector filters out disruptive line noise that can disturb your electronics and inflict hardware damage or data loss. This EMI/RFI filtering also helps your connected components perform better and last longer.

Premium Safety Features for Protecting Your Valuable Equipment A green LED confirms that your connected equipment is protected. In the event of an overload, a 16-amp circuit breaker immediately shuts down the surge protector to prevent equipment damage.
