PSA10F Series – Expiration of Brazil and Australia/New Zealand Safety Approvals

Dear Valued Phihong Customer:

The Brazilian safety approval for the PSA10F-050-R, PSA10F-050(P)-R, PSA10F-050Q-R, PSA10F-050Q(D)-R, and PSA10F-050Q(S)-R adapters is expiring and due to limited demand will not be renewed. All new builds going forward for these models will be without the Brazilian safety approval.

In addition, the Australia/New Zealand safety approval for PSA10F-050-R, PSA10F-050(P)-R, PSA10F-050Q-R, PSA10F-050Q(D)-R, and PSA10F-050Q(S)-R will be expiring soon. Australia/New Zealand regulatory authorities will no longer accept the use of the FPS-H AC power clip so the RCM safety approval will soon be removed as well. The last time purchase date for **new builds** of any of the PSA10F-050-R, PSA10F-050(P)-R, PSA10F-050Q-R, PSA10F-050Q(D)-R, or PSA10F-050Q(S)-R with the RCM approval will be January 27, 2021 with delivery prior to June 30, 2021.

If you require the PSA10F-050Q-R for Australia/New Zealand then the recommended replacement model is the special order PSA10FS-050Q-R. If you require the PSA10F-050Q(D)-R for Australia/New Zealand then the recommended replacement model is the special order PSA10FS-050Q(D)-R. The datasheet for the PSA10FS models can be accessed at <https://www.phihong.com/admin/uploads/PSA10FS-050Q-R.pdf>.

Sincerely,
