## TE Connectivity

Product Change Notification: P-14-010068

PCN Date: 08-APR-14

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

**General Product Description:**  
Contact, Female, Generation Y, 0.64mm Silver Plated

**Description of Changes**  
TE Connectivity (TE) is implementing a running change to its Generation Y female receptacle family replacing silver plating in the crimp area with 0n plating. This change has been tested and approved to USCAR-21 meeting all necessary performance requirements. End users of these terminals will not have to modify or change any current termination applicator equipment. TE does not foresee any process adjustments through the transition and implementation of this change. TE is implementing this change on existing manufacturing plating processes using proven 0n plating baths. Key benefits of this change will be to help eliminate silver plating build-up on termination applicators as well as changing to a more preferred plating within the crimp area.

**Reason for Changes:**  
Product improvement.
