

G2RL-1AE-ASI Power PCB Relay

New
Product
Introduction

OMRON
ELECTRONIC COMPONENTS

OMRON is pleased to announce the release of new **high inrush G2RL-1AE-ASI, capable of handling 51A inrush current.**

KEY FEATURES & BENEFITS:

Features	Benefits
TV-3 rating 40°C, 25,000 operations	High inrush capabilities (51A)
16 A, 250 VAC (resistive) 85°C resistive load, 30,000 operations	High switching capacity
Standard footprint	Easy option for your existing projects
Small size	Saves board space

UL/CSA/VDE

APPLICATIONS:

- HVAC: Boiler Controls
- BA: Shutter Control
- Laundry Machines: Controlling Dryer Heater
- Refrigerators: Switching Compressors

OTHER POWER RELAYS:

G5RL-TV8

Capable of handling high inrush current 117A

G5RL-LN

Low noise– quiet operation 16A relay

G5Q-EL2

Capable of handling high inrush current 40A
